

Name: Cards overlapping on desktop

Status: Closed

Description:

The cards intended for indicating different categories of the website are overlapping

Steps to Reproduce:

1. Open the project's root folder by downloading from <https://github.com/Dilraj-Joty-Kelly/mdia-4590>
2. Open the index.html file
3. The issue is now resolved by adding a parent child structure to the cards, along with relevant margin spacing. Review the index pages version history to visually see the code changes.

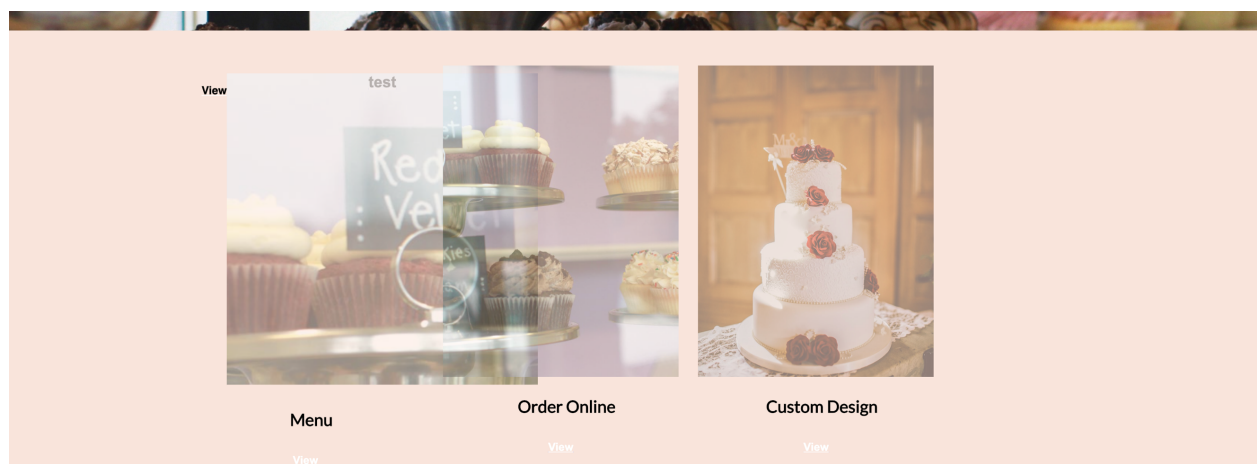

The issue is now resolved

Expected result:

There should be no overlapping between the cards.

Actual Result:

The cards on the index page overlap

Configuration:

This issue appears on any Desktop, or laptop screen

	Safari	Chrome	Firefox	Edge	IE11
OSX Mojave					N/A
Windows 10 Desktop	N/A				
Windows 10 Laptop	N/A
